

Did you know?

- Homes built in Canada prior to 1980 are not bolted to their foundations.
- **"If you own a home anywhere west of the cascade mountains, bolt it to its foundation.** The majority of private homes in the timber-rich Pacific Northwest are made of wood—and wooden homes, like trees themselves, are supple enough to withstand even powerful shaking. Those that are bolted to their foundations should fare very well in the Cascadia earthquake. Conversely, those that are not bolted down will jolt off their foundations and collapse, imperilling everything –and everyone–inside them."

In our customers' words

“ Mike and his team were amazing! On time, on budget and great communication every step of the way. The QuakeSafe crew exceeded all expectations. They cleaned up so well after the job that you'd never know they were there!

Retrofitting our home with QuakeSafe was the best investment we've ever made. I sleep so much better at night knowing that we've done everything we can to keep our family safe and make our house as earthquake ready as possible. Highly recommended. ”

- The Harper-Restoule family, Esquimalt

“ Please thank Brett and Robert for me for working efficiently and thoroughly. They were polite and diplomatic throughout the time they spent at our house. We are very pleased with the results! ”

- Rosa, Denman Island

“ Really very pleased with the result, thanks Mike! Happy to recommend QuakeSafe to anyone who is interested! ”

- Don, Saanich

“ Hey Mike! Your team is great. They are so friendly and professional. Brett was good at explaining everything. ”

- Jennifer, Vancouver, BC

“ We had also considered a construction contractor for the work. However, that contractor lacked expertise in seismic retrofits and was extremely slow in answering questions and producing a plan...In contrast Mike Ursel has a lot of expertise and experience in seismic retrofits and is very responsive and informative. Having decided on QuakeSafe, we were pleased to discover that the two tradesmen were qualified carpenters with a lot of experience in building homes. ”

- Alan, Victoria, BC

“ I can recommend Mike and his crew without reservation! ”

- Mary, North Vancouver
